

**STATE OF RHODE ISLAND AND PROVIDENCE PLANTATIONS  
ENERGY FACILITY SITING BOARD**

**IN RE:     Application of Invenergy Thermal  
          Development LLC's Proposal for  
          Clear River Energy Center**

**Docket No. SB-2015-06**

**INVENERGY THERMAL DEVELOPMENT LLC's RESPONSES TO  
CONSERVATION LAW FOUNDATION'S FOURTEENTH SET OF DATA REQUESTS**

Request 14-5           (a) Does Invenergy believe that it remains possible for it to have a Commercial Operation Date of May 31, 2021 (or June 1, 2021) given the failure to sign the LGIA by December 1, 2017. (b) If yes, set forth in detail the basis of this belief, and explain specifically how this could be possible in light of the missed LGIA deadline and ISO Tariff requirements pertaining to sequential scheduling of a project's In-Service Date, Initial Synchronization Date, and Commercial Operation Date. (c) If your answer to sub-part (a) was no, please state the currently hoped-for Commercial Operation Date.

RESPONSE 14-5       (a) Yes, Invenergy believes that it remains possible for it to have a Commercial Operation Date of May 31, 2021.

(b) Invenergy is an experienced developer and builder of energy infrastructure. Specifically, over the last 17 years, Invenergy has developed, built and/or owns and operates 400 miles of transmission, 55 high voltage substations and over 16,000MW of solar, storage, thermal and wind facilities. Invenergy's own construction experience and experience working with other utilities in the US and internationally, suggests that the work identified in the LGIA can be constructed typically in 24-30 months.

RESPONDENT:         Kris Zadlo, Invenergy Thermal Development LLC
